HISTORY

Montrose Hill merino stud was founded in 1968 and was established to service a commercial flock using the fine wool families from Merryville Flock 56 and its daughter studs. Extensive AI and embryo transfer programs are used today sourcing only the very best genetics to enhance production and retain micron. Stringent selections within Montrose Hill are producing structurally sound large framed sheep with excellent constitution and free growing wool in the 16 -18 micron range. Wool Clip adult average 17.5 micron.

Montrose Hill Poll stud was founded in February 2016 and registered in September 2017 with the purchase of 1 ram from Pendarra Poll, semen from Yarrawonga Poll and the transfer of 140 Montrose Hill stud ewes.
